- / REACTIVITY
- / CONNECTIVITY

TRANSLATION CENTRE  
FOR THE BODIES OF THE EUROPEAN UNION

Download our leaflet

Nowadays, fast and permanent access to information is an asset, if not a requirement, in most situations. This applies both in our private as well as our professional lives. For the latter, the Centre decided to respond to this need by providing a tool that is accessible via an object that most of us carry around, the ubiquitous mobile phone. This is how **eCdT4me**, the Centre's mobile app was born.

The **eCdT4me** app enables our clients, contractors, and in-house translators to access services that were previously accessible only through the Centre's web portals. Using the mobile application allows a different approach to our services: by tapping the app's full potential we can provide a user-friendly interface, connectivity to our services from wherever you are, and a real-time notification system.

## What are the benefits?

Depending on your user profile, **eCdT4me** allows you to interact with the Centre's translation workflow in different ways. Indeed, three user profiles are available:

**Client:** this profile allows our clients to place requests, track their translation request status, and download the outcomes. In this way, the app offers greater accessibility and facilitates mobile interaction between clients and the Centre.

**Contractor:** this profile allows our contractors to consult, and accept or reject linguistic service tasks. Notification pop-ups update contractors so that they can react quickly to any task assignment and job offers. This will allow the Centre to speed up the outsourcing of work.

**In-house translator:** this profile allows our in-house translators to track their activity status and task requests. Translators also have access to their notifications, and benefit from notification pop-ups. This enables them to be highly reactive to urgent tasks.

Our **eCdT4me** mobile app is available through both the Google Play Store and Apple App Store. It works on tablets and cell phones.

Anyone with an account on the CdT Client Portal, CdT Freelance Portal, or the eCdT platform, will be able to use their account on the mobile app through their corresponding user profile.

Whichever user profile you have, wherever you are, and whatever you do, let's stay connected through the **eCdT4me** mobile app!
